Characterization of distribution 2019

Berly'sm Jansson

A distribution by a corporation to its shareholders is treated as a dividend for US federal income tax purposes to the extent it comes from current or accumulated earnings and profits and thereafter as a return of capital to the extent of a shareholder's basis in his shares. A distribution that exceeds current or accumulated earnings and profits and the shareholder's basis will be treated as return of capital.

In 2019 Nordic American Tankers Limited ("NAT") distributed a total of \$14.2 million to its shareholders. Based on the fact that NAT had no current or accumulated E&P at the time of these distributions, NAT believes that all of these distributions are treated as a return of capital for U.S federal income tax purpose.

NAT is a non-US company. You should consult your tax advisor regarding the federal, state, local and other tax consequences of those distributions.
